# The MENTEP challenge

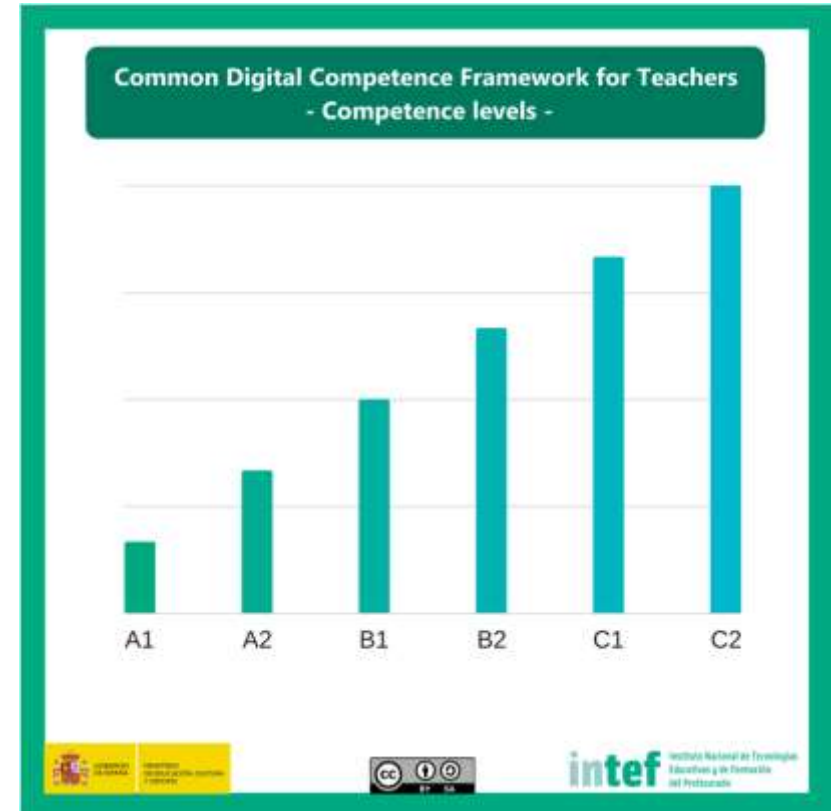

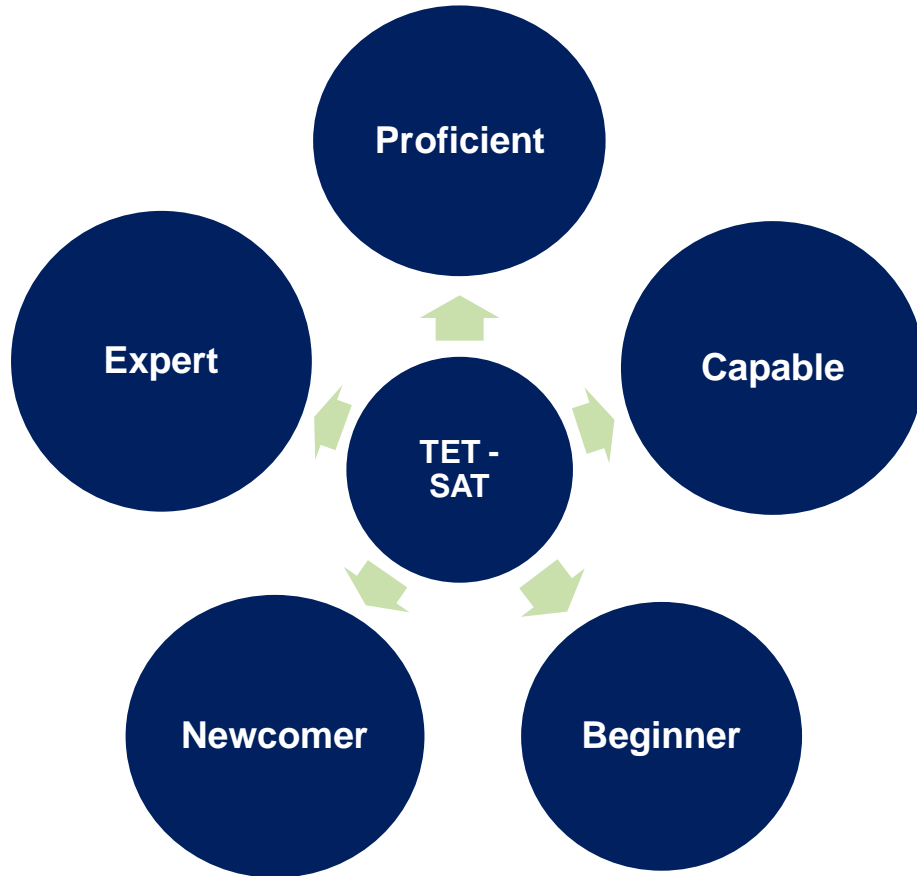

Technology Enhanced Teaching  
(TET) competence

José Luis Fernández

# TET competence areas

# Proficiency levels

# TET progression

Area → Area 2. Digital Content Use and Production

Subarea → 2.1. Selection and use of digital resources

Further info →

Digital Resources= digital content, products or online services (e.g. Wikipedia), software and tools (e.g. Photoshop, camera, digital devices, digital technology)  
 Digital learning resource= electronic resources used by teachers and learners as a resource for learning

Levels →

Newcomer	Beginning	Capable	Proficient	Expert
----------	-----------	---------	------------	--------

Competence →

2.1.1. Finding and evaluating digital information  
**Competence: Capacity to evaluate digital information ( Information Literacy )**

Progression →

I rarely look for information online in order to use it in my teaching, and rely on paper/analogu e traditional sources (e.g. textbooks).	I find information online that I use in my teaching. I use information that is conveniently available online. I would like to acquire more strategies for finding relevant and quality information.	I select and use information I find online, critically evaluating the value of the information.	I teach my students criteria and strategies for evaluating and verifying information they find online.	I teach my students to apply criteria and strategies for evaluating and verifying information they find online, and engage my students in peer evaluation of the information found.
